Learning Centre News

There's a lot to find in our Learning Centre.

Did you know that you can:

- Watch recordings of every webinar that CBN has delivered since 2017, and, best of all, you'll automatically be awarded a CPD certificate when you watch an entire recording.
- Upload any training certificates you receive from external bodies, such as Steadfast, insurers, LMI etc. Once they're approved by CBN, the points will be added to your training history
- Register for upcoming webinars
- Undertake eLearning courses on a range of topics, such as advising clients on contractual obligations or the difference between a named insured and an interested party. There's also a Business Interruption Essentials course that takes through everything you need to know to set up a BI policy for a client.
- Access your training history at any time. You don't need to keep your own training register any longer – just record it all in the Learning Centre.

We also have video courses which look at a range of activities in the Steadfast Client Trading Platform (SCTP).

The catalogue is constantly growing, so make sure you log in and have a look around regularly.

You can access the Learning Centre via the Gateway, the Broker Kitbag, or simply click [here](#).
